Instrumentation and equipment for
environmental monitoring and research

Digital Measuring Board - Zebra-Tech

- Rapid Sampling
- Wireless to IOS/android
- Wireless to Deck Logger
- Proven in the field
- Rugged construction
- Simple to use
- Digital display
- Long battery life
- Easy cleaning

Rugged, portable and splashproof - wash it down with a hose, use it where you need it.

Zebra-Tech's wireless Digital Measuring Board enables thousands of measurements to be recorded at button push without the errors common to using paper based recording.

A simple "slide and press" operation makes it easy to use. The Digital Measuring Board can be hosed down for cleaning. Data is stored on board and offloaded wirelessly using bluetooth to a smartphone app, a Zebra-Tech Deck Logger or Zebra-Tech wireless to serial interface cable.

Instrumentation and equipment for
environmental monitoring and research

The Zebra-Tech Digital Measuring Board, perfect for field surveys, wet labs and vessel decks. Available with a standard bed for measurements under 230mm or use the extended version for measuring up to 720mm.

Use the free Zebra-Tech App to offload data to your android or IOS smartphone or tablet.

Each record is date and time stamped, and offload is in the form of a .csv file suitable for immediate import into a spreadsheet or database.

“The New Zealand Paua Industry uses Zebra-Tech Digital Measuring Boards for our data collection program and the catch sampling contract we have with the Ministry of Primary Industries. The boards are simple to use and greatly speed up the whole measurement process for us without having to waste time on data entry - a huge time saver.”
